Summary

Enthusiastic computer science graduate with knowledge of **programming languages, web development, and problem-solving skills**. Passionate about learning new technologies and developing innovative solutions. Seeking an opportunity to start a career in software development and contribute to team success.

Technical Skills

Programming Languages: Python, C++
Web Technologies: HTML, CSS
Databases: MySQL
Tools: VS Code ,GitHub, PyCharm
Core Skills: Data Structures, Artificial Intelligence, Problem Solving

Education

Bachelor of Engineering in Computer Science[VTU], Rajarajeswari College of Engineering, Bangalore(CGPA-8.4)	2021-2025
Department Of Pre-University Education[PCMCs], RNS PU College, Bangalore(percentage-83%)	2019-2021
Karnataka Secondary Education Examination Board, Mother of Good Health English School, Bangalore(percentage-80%)	2019

Project

- AI Tool For Preliminary Diagnosis Dermatology Manifestations**
This project uses the MobileNet deep learning model to automatically classify skin diseases from uploaded images with high efficiency and accuracy. It also provides personalized remedy recommendations through a Flask web application, helping users identify and manage skin conditions quickly and easily.
- Gym Management System**
Developed a “GYM MANAGEMENT SYSTEM” using HTML and SQL. This project provides a platform to store the details of gyms, payment areas, trainers and members and can also access the data.
- Volume Control With Hand Detection**
Project aims to develop volume controlling of the device with the help of the camera using the tips for our thumb and index finger

Certifications

- AI-Machine learning (Training)-By Rooman Technologies Pvt. LTD from(Sep 2024-Feb 2025)
- Java and Data Structures certificate (workshop)-Aug 2023[certificate no-TF2023032]
